I'm a Mechanical Engineer turned JS developer based in Mexico.
I'm a self-taught developer so, by any means I'm a master at it,
still/always learning and passionate about it. I enjoy solving all
kinds of problems and meeting new people from different cultures.

Work Experience

Node Js Developer (March 2020 – December 2021)

Mexico, Mx.

- Fully in charge of developing an API using 10+ scrapers and private APIs to provide salesmen real-time prices of products. This decreased the time salesmen committed to looking for prices on the web from 8 minutes to 2 minutes.
- Worked with a designer to fully rework an e-commerce, this rework increased the number of total sales almost 20% and increased the conversion rate from 2.17% to 4.15% a month after the release of the new version of the store.
- Developed a collapsible menu with a system of tags to filter search results which boosted the amount of people adding a product to the cart by almost 10% and improved the conversion rate from 0.62% to 0.71%.
- Collaborated with designers to create and/or improve several functions like carousels, drawers, carts, badges, etc. for 3 different e-commerce websites.
- Developed a small React login page for the salesmen to use, this was meant to help keep track of their sales and clients. (Never got deployed)
- In charge of being in touch with developers from other companies for possible bugs, crashes, or updates in their API services.

Education

Metropolitan Autonomous University (UAM)

Mexico, Mx.

- Bachelor of Science, Mechanical Engineering, December 2021
GPA: 3.54 out of 4.0

Skills

- Programs: Visual Studio Code, Git,
- Languages: JavaScript/NodeJS, TypeScript (basic).
- Frameworks: React.
